2004 ANNUAL NEPA PLANNING SUMMARY
Pantex Site Office
Amarillo, Texas

Expected Environmental Impact Statements Within Next 24 Months

No Environmental Impact Statements are planned in the next 24 months.

Expected Environmental Assessments Within Next 12 Months

None anticipated for CY04.

Evaluation of Whether A Site-wide Environmental Impact Statement Would Facilitate Future NEPA Compliance Efforts

A supplement analysis (SA) was prepared to evaluate the *Final Environmental Impact Statement for the Continued Operation of the Pantex Plant and Associated Storage of Nuclear Weapon Components (SWEIS).* This SA met the Department of Energy (DOE) regulations that require that Site-Wide EISs be evaluated at least every 5 years after issuance to determine whether a supplemental or new EIS is necessary (10 CFR 1021.330[d]). *DOE/EIS-0225/SA-03* was finalized in February of 2003. The determination was made that the current Site-Wide EIS, DOE/EIS-0225, adequately represents and analyzes impacts from the continued operation of the Pantex Plant and, therefore, no further NEPA documentation is required.

Status: SA determination 3/10/03
